

## because we care

## we are social responsible

Cane-line products are manufactured with the greatest care for our environment and the well-being of people. We believe that responsibility goes beyond the design and production of furniture. Our production is committed to a sound environmental policy and an ongoing focus on improving working conditions in the countries in which we operate. This means among others that no child labour is allowed and that wage levels are fair and in accordance with local legislation. In addition, we are very conscious about the consumption of resources, about recycling and the cleaning of wastewater. Cane-line is certified by ISO14001:2015 and SMETA by DNV-GL. Our corporate conduct and activities have earned international certifications submitting us to external control on an on-going basis. This is your guarantee that we are committed to safeguarding people and the environment.

The UN Global Compact is a strategic policy initiative for businesses that are committed to aligning their operations and strategies with ten universally accepted principles.

This printed matter is carbon compensated according to ClimateCalc. Offsets purchased from: South Pole Carbon. Cert. no. CC-000033/DK

Cane-line teak is approved and forested under the SVLK – Sistem Verifikasi Legalitas Kayu (Indoneasia's timber legality assurance system) certification

Cane-line is certified by the international certification DNV-GL (Det Norske Veritas) ISO14001:2015.

Cane-line is audited by DNV-GL (Det Norske Veritas): SMETA (Sedex Members

Cane-line is audited by DINY-GL (Det Norske Veritas): SMETA (Sedex Members Ethical Trade Audit). SMETA is the worlds most commonly used etchical audit format.

#### comfort is our core value

Our core value is comfort in all aspects of our furniture. We have used countless hours developing and choosing the right designs, technology and materials. Comfort for us is how well you sit or lay, how smooth our furniture functions, the very low maintenance, our QuickDry & Airflow system, the easy cleaning and the long lasting materials. Our mission "life made comfortable" is total comfort for you.

#### all weather furniture

Our Cane-line designs can be used all over the world and under any climatic conditions. The strong frames, UV-resistant materials and quick drying cushions can stay out in glaring sun, pouring rain or frost. The materials in our outdoor collection withstand large temperature differences and season changes. To prolong product lifetime, we recommend that furniture is placed indoors during winter or covered with one of our covers. The entire outdoor collection is easy to maintain, however ordinary cleaning of your furniture will keep it looking it's best for years and prolong its lifetime.

All products with the QuickDry & Airflow system symbol have cushions with QuickDryFoam<sup>®</sup>. Read more on page 171.

# meet our designers

Cane-line works with leading Danish designers. They all share deep roots in the Danish design tradition built on craftsmanship, quality and distinctive expression. They also share an understanding of our Cane-line vision "life made comfortable" which is integrated in every design.

#### Foersom & Hiort-Lorenzen MDD

Johannes Foersom and Peter Hiort-Lorenzen (MDD) are two of Scandinavia's most renowned and successful furniture designers. Their goal is to create long-lasting value, and to stimulate a healthy development for people and their surroundings. They strive towards the highest quality in cooperation, process and product, and believe that knowledge and innovation are fundamental. The impressive use of exibility makes the furniture appear as small architectonic wonders.

#### Strand+Hvass

Christina Strand (MDD) and Niels Hvass (MAA) are part of the new generation of Scandinavian designers. They believe that design itself is a strategy that can improve the conditions of human life, the environment and personal experiences. Additionally, they believe that design can be used as a tool to develop the competitive power and economic growth of society. Their design is usercentered and deeply rooted in the Scandinavian culture. Simplicity and well-balanced lines are the cornerstones of their work.

### Welling/Ludvik

The design duo Welling/Ludvik, Hee Welling and Gudmundur Ludvik, are contributing to the renewal of environmentally friendly design centered around personal experience. They are defined by a pure aesthetic, stripping away excess and letting each detail serve a functional purpose. They aim to achieve the best possible solution as seen from a number of perspectives. Comfort, materials, construction, pricing and environment are all defining factors in their approach to design.

### **byKATO**

ByKATO, Karl Rüdiger Rossell and Tonny Glismand, are dedicated to creating contemporary, highly usable products for everyday living. They aim to bridge the gap between commercial, industrial design and high-quality craftsmanship by using honest and justifiable materials and paying careful attention to even the smallest detail. Their mantra is to design products, which they would like to have themselves so they always take starting point in their own needs. In this way it all comes from the heart and the required enthusiasm is always present.

#### Rikke Frost

Rikke Frost believes that the materials and their combination create a unique experience both visually, functionally and tactile. She is often fascinated by a material or a certain production method. Through the combinations of materials and by exploiting their properties, she creates a natural utility. The designs must be seen and felt. The idiom is recognizable and simple, focusing on colour, detail and surprising features that give the experience of a uniform design.

#### Jesper K. Thomsen

Jesper K. Thomsen believes that design and product development is about being realistic. He is an experienced designer who is known for creating simplified designs that solve complex challenges. It is about the right quality at the right price, and about durability. Fine sketches on the art board are worth nothing, if it cannot be produced at the right price or even be produced at all.

#### Cane-line design team

At Cane-line the core value for good design is comfort and we believe in the optimal mix between aesthetics and functionality. Our own internal design team is working every day with this in top of mind to create an optimal collection with unique products adding value to your life and making your life more comfortable. Cane-line design team is also working closely with our external designers.

# Furniture covers

Cane-line outdoor furniture is weather-proof, but changing weather and falling leaves leave their marks. By using protective covers, you can save time on cleaning. Keep your furniture looking sharp and prolong their lifetime. MAKE SURE NOT TO COVER WET FURNITURE. DRY BEFORE COVERING.

Cane-line covers are made from a strong solution-dyed polyester fabric, which protect the furniture during the winter. Covering furniture for the winter makes spring cleaning easier and prolongs the life of the furniture. It is advisable to check covers after heavy falls of rain/snow and remove any water that has collected to ensure that the furniture remains properly covered. For further information go to www.cane-line.com/collections/covers

# QuickDry & Airflow system

Our Cane-line QuickDry & Airflow system offers cushions with our special QuickDryFoam®. The unique cushion composition with QuickDryFoam® ensures a quick drainage after heavy rain and an effective air circulation in humid weather conditions. The benefit is dry cushions approximately one hour after heavy rain and no risk of mould building inside the cushions due to the constant air circulation.

We recommend to store cushions indoors in a ventilated room or in one of our cushion boxes during winter season or when not in use for a longer period.

For more information regarding maintenance and cleaning: www.cane-line.com.

All series with the QuickDry & Airflow system logo are delivered with QuickDryFoam®. All other cushions are delivered with our high quality Cane-line foam (cold foam).

### Cushion composition

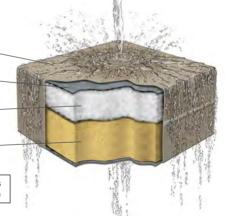

Outer cover/fabric

Inner cover/rain cover

Padding

QuickDryFoam®

90% of rainwater is repelled, whereas only 10% passes through the cushion

Approximately one hour after rainshowers your cushions are dry, and you can sit comfortable in your furniture again

# Technical information

### Materials & care

### Cane-line Weave®

Cane-line Weave® is a fibre made from highly durable, solution dyed polyethylene (PE), which is ideal for outdoor use because it withstands moisture and large variations in temperature. Both the structure of the fibres and the weave ensure elasticity and optimal sitting comfort. The durable material is UV-resistant and requires minimal maintenance. Cane-line Weave® has been developed to withstand climate conditions all over the world and the material will retain its colour and shape for many years. All products are handwoven with the Cane-line Weave® fibre, which can vary slightly in colour, creating a nice contrast in the surface of the weave. This gives the furniture a unique, natural and explosive look.

### Cane-line Rope

Cane-line Rope is a combination of a woven Selected PP covering (a thermoplastic fibre) over a core of Cane-line Weave®. The material is elastic and has a soft surface that acts like a fabric. Avoid pulling/pushing the elastic material too hard as this may cause it to lose its shape on the furniture. This weatherproof material withstands changing weather conditions, is UV-resistant and dries quickly after getting wet, which makes it ideal for outdoor use. It is easy to maintain and can be cleaned with ordinary household cleaners.

### Cane-line Soft Rope

Cane-line Soft Rope is a woven Selected PP fiber. The material has a soft surface that acts like a fabric. Avoid pulling/pushing the material too hard as this may cause it to lose its shape on the furniture. This weatherproof material withstands changing weather conditions, is UV-resistant and dries after getting wet, which makes it ideal for outdoor use. It is easy to maintain and can be cleaned with ordinary household cleaners.

### Cane-line Tex®

Cane-line Tex® is a coated polyester material that is ideal for outdoor use and requires minimal maintenance. Cushions made from Cane-line Tex® come with a QuickDryFoam® core, ensuring maximum drainage and air circulation. This allows the cushions to dry faster after having been exposed to rain and moisture. The QuickDryFoam® core also has anti-bacterial protection, reducing the risk of mould and mildew forming on the cushion.

### Cane-line SoftTouch®

Cane-line SoftTouch® is a material produced exclusively for Cane-line. SoftTouch® combines the strength of Cane-line Tex® with the comfortable softness of the Sunbrella fabric, resulting in a soft yet durable surface. Cushions made from Cane-line SoftTouch® come with a QuickDryFoam® core, ensuring maximum drainage and air circulation. This allows the cushions to dry faster after having been exposed to rain and moisture. The QuickDryFoam® core also has antibacterial protection, reducing the risk of mould and mildew forming on the cushion.

### Cane-line Natté

Cane-line Natté is a unique material produced by Sunbrella for Cane-line. Cane-line Natté combines the strength of normal all weather fabrics with the comfortable softness of the traditional Sunbrella fabrics, resulting in a soft yet durable fabric.

### Cane-line Virtue

Cane-line Virtue is UV-resistant. In case of food or drink stains, wash the spot immediately with warm soapy water and allow the pillow to dry in an upright position.

For more thorough cleaning, all pillow covers can be removed and machine-washed at  $30^{\circ}\text{C}$ . Make sure the cover is completely dry before putting it back on the pillow.

### Cane-line AirTouch

Cane-line AirTouch fabric combines the strength of Cane-line SoftTouch with the softness of Cane-line Natté produced by Sunbrella. It is a 100% solution-dyed acrylic fabric. Cushions made from Cane-line AirTouch are produced with a QuickDryFoam core, ensuring maximum drainage and air circulation. This allows the cushions to dry faster after having been exposed to rain and moisture. The QuickDryFoam core also has anti-bacterial protection, reducing the risk of mould and mildew forming on the

### Selected PP

100% polypropylene (PP) and UV-resistant. In case of food or drink stains, wash the spot immediately with warm soapy water and allow the pillow to dry in an upright position. For more thorough cleaning, all pillow covers can be removed and machine-washed at 30°C. Make sure the cover is completely dry before putting it back on the pillow.

### Materials & care

### Cane-line Teak

Cane-line teak is approved and forested under the SVLK – Sistem Verifikasi Legalitas Kayu (Indoneasia's timber legality assurance system) certification system. Teak is a hardwood that is ideal for outdoor use due to its high oil content. Our teak furniture is delivered untreated. If the furniture remains untreated, the teakwood will patina over time and turn pale grey colour. If you wish to retain the original golden colour, we recommend treating teak furniture with a recommended teak sealant. Please note that teakwood is a natural product and therefore continues to change. This means that small cracks can develop due to drying and that slats can warp slightly.

### Aluminium powder coated

All our aluminium furniture is powder coated. Powder coating serves as a protective layer that is tinted in a variety of colours. Aluminium furniture is ideal for use outdoors as well as indoors.

### Stainless Steel

Stainless steel is extremely weather proof. However, tarnishing can occur in the form of flash rust. This can be removed by using a stainless steel cleaner. Regular cleaning with soapy water helps to protect the surface of the stainless steel and thus minimise the effects of chlorine, etc. It is also advisable to wipe the frame with acid-free oil at least twice yearly to minimise tarnishing.

### Glass

All glass tops are made of thoughened glass. The glass has been through a process, where it has been heated to approx. 650 degrees and then cooled.

This curing of the glass makes it up to 5 times stronger than ordinary glass and less prone to cracking and breaking.

### Travertine

Travertine is a limestone with small, natural holes, giving it a rustic look. It also has a lovely, natural variation in colour, which means that no two travertine tops are ever identical. Travertine table tops are not frost proof and must therefore be stored indoors during the winter. The table tops are treated with a sealer, but it is advisable to wipe up any spills immediately. We recommend treating your travertine table top at least once per season with natural stone oil.

### Ceramic

The ceramic tops/tiles are made of porcelain, which is an extremely strong material that can be left outdoors all year round. They are made using natural materials, so there may be small variations in colours between the tops/tiles.

### HPL high pressure laminate

Compact laminate is a very suitable material for outdoor use. The material is resin-impregnated paper, compressed under very high pressure creating a strong top with a scratch-resistant surface. These table tops require basically no maintenance and can remain outdoors all year round. Compact laminate will naturally fade slightly at the edges over time. In order to maintain the deep black colour, the edges can be freshened up by rubbing a little linseed oil on them. It is recommended that you cover the table with a furniture cover in the autumn and winter period.

### Cane-line HI-Core

Cane-line "Hi-Core" Stone is an innovative and durable Hi-tech composite core material developed specially for all weather outdoor use.

The components are mainly acrylic, which gives high durability and abrasion resistance.

Cane-line HI-Core has an elegant smooth and soft surface that rejects moisture, dirt and bacteria.

We recommend that you cover the table with a furniture cover during the autumn and winter period.

### Easy care

Wash with water mixed with mild soap and remove stains with a sponge or medium brush.

For more information regarding maintenance and cleaning: www.cane-line.com

# Cane-line indoor

Materials, sculptural expressions and versatility that capture modern design. The collection is the essence of light simplicity. Your home is where the heart is and your home shows the gallery of your life. See more at cane-line.com

### When comfort matters

Accommodating and flexible furniture arrangements are a must. Room, respect for the individual and time have never been more important. At Cane-line we are aware of this and we work closely with our international project partners to provide customised solutions. Our partners have high demands for quality, comfort and aesthetics and Cane-line's timeless and thoroughly-developed designs can satisfy these needs.

Our furniture is fit for heavy use over long periods of time yet require only slight maintenance even when used in places where large crowds come and go. Choose your own style and expression for formal meeting points, comfortable waiting spaces or relaxed lounge areas. Whether focus is on the individual or social gatherings.

Our Danish design lives up to the brand identity of our project partners, and our corporate conduct and operations match international expectations about Corporate Social Responsibility (CSR). As a result, our customers include a wide variety of companies in the public and private sector, institutions, exclusive hotels, cruise lines and resorts. See more at cane-line.com
